THE LEADERSHIP SHIFT

At a certain point in a leadership career, **success starts to feel heavier than it should.**

You're trusted. You're capable. You've earned your role. And privately, you're carrying more than ever; decisions, responsibility, expectations, and uncertainty.

The habits that made you successful earlier in your career no longer scale, and **may now be limiting your impact.**

What is the Leadership shift?

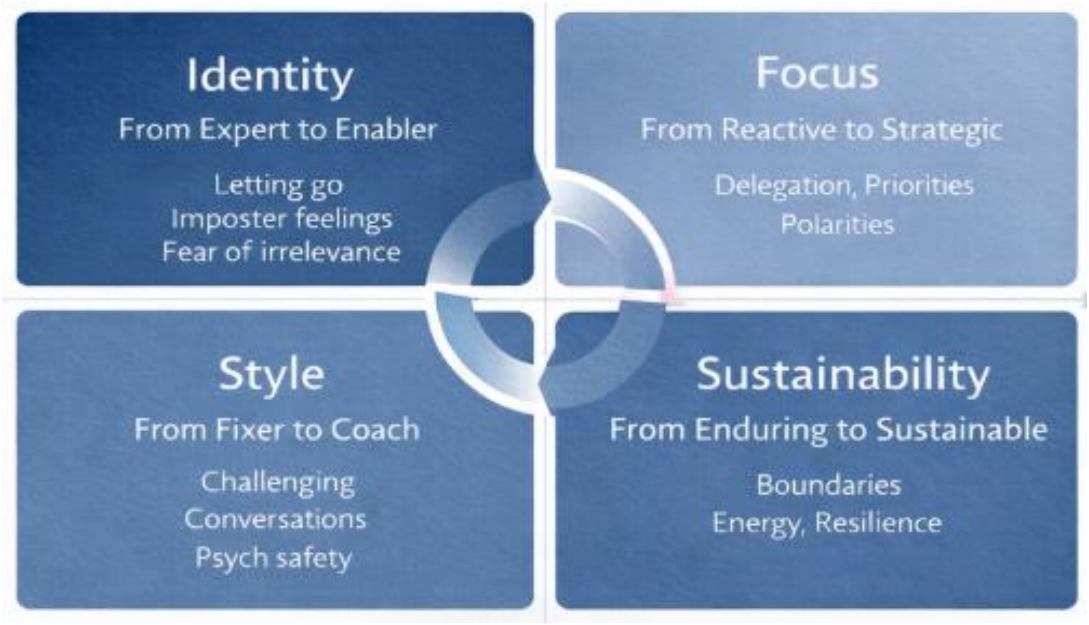

The Leadership Shift is a 12-week coaching container for senior leaders whose roles have outgrown their habits, and ready to scale impact through others without carrying everything themselves.

What is the work?

Over 12 weeks, you'll have:

- 6 x 60-minute 1:1 coaching sessions
- a short diagnostic and reflection before we begin
- access to interactive workshops, models and materials
- practical experiments between sessions
- space to reflect and integrate

What is your primary shift?

Most leaders experience **one primary shift**, supported by one or two secondary shifts we identify together.

Who is this for?

This work is **for leaders who:**

- ✓ are already trusted and performing well
- ✓ feel their role has become heavier or narrower over time
- ✓ sense they're becoming the bottleneck
- ✓ want to lead at the next level without losing credibility, drive, or standards

This work is **not for:**

- × leaders looking for quick tips/ performance hacks
- × early-career managers learning foundational skills
- × organisations seeking generic leadership training

What is the next step?
